

Thursday, June 1

Sponsor Host: Susan Macleod, Bruce Power, Canada

- 7:00 a.m. – 5:00 p.m. Registration
Viennese Ballroom Foyer
- 7:00 a.m. Continental Breakfast, sponsored by Atlantis Systems International
Regent Ballroom
- 8:00 a.m. "The World of WiN" - WiN Global Regional Chapter Representatives'
Presentations
Regent Ballroom

Each WiN chapter will share its achievements since WiN members last met in the Czech Republic for WiN-Global 2005. A series of brief presentations will highlight the best of WiN in 2005 and 2006 providing inspiration and ideas to women in nuclear from around the world.

Morning presentations will be made by representatives from Australia, Belarus, Brazil, Bulgaria, China, Czech Republic, Finland, France, Indonesia and Japan.

- 10:00 a.m. Poster Viewing and Refreshment Break, sponsored by AREVA
Regent Ballroom
- 10:30 a.m. Concurrent Sessions
"Beyond Energy: The Latest Nuclear Advancements in Healthcare,
Agriculture, Manufacturing and Elsewhere"
Salon C, Viennese Ballroom

If Madame Curie were alive today, she would be astounded by the applications of radiation technology. Given the nuclear advances from food preservation to diagnostics and treatments in the medical field to sterilizing techniques for daily use products and even rubber vulcanization, it is evident that nuclear plays an important role in our lives. Experts will explain their contribution to developing the varied uses of nuclear energy.

Moderator:

Caroline Vandenberg, VP Marketing, MDS Nordion, Canada

Panellists:

Dr. Saeeda Asghar, Director, Institute of Nuclear Medicine and Oncology, Pakistan

***Dr. Alumanda Dela Rosa, Director, Philippine Nuclear Research Institute,
Philippines***

Dr. Karen Gulenchyn, Chief, Nuclear Medicine, Hamilton Health Sciences, Canada

Dr. Salimata Wade, Professor, Université Cheikh Anta Diop de Dakar, Senegal

"Communicating the Nuclear Message"

Salon B, Viennese Ballroom

In a world of increased transparency, global energy shortages, more sophisticated NGO's and an engaged and knowledgeable public, the nuclear industry and its communicators are facing challenges they have never before had to overcome. The "social license" to operate a nuclear facility is no longer easily granted by the public and a broad range of stakeholders must be engaged in more meaningful dialogue. But what does that really mean and how do you do it? Hill & Knowlton has a 79-year history of generating success for its clients around the world. Using real examples, Tonie Chaltas will share the new best practices in communications, how they have been used to deliver significant business impact to other companies and will outline an innovative approach to developing the nuclear message.

Presenter: Tonie Chaltas, Senior VP, Hill & Knowlton Canada

"Nuclear Facility Life Extension and Rehabilitation: The Canadian Experience"

Salon A, Viennese Ballroom

For a number of reasons, from necessity to public policy, the Canadian nuclear industry has refurbished and restarted reactors and launched programs to refurbish and extend the life of others over the last few years. Project representatives will share their experiences and outline the critical success factors for these significant investments.

Moderator:

Lily Buja-Bijunas, Senior Planner, Ontario Power Authority, Canada

Panelists:

Cheryl McCulloch, Conventional Safety Manager, Units 1 & 2 Refurbishment and Restart Project, Bruce Power, Canada

Dr. Basma Shalaby, Chief Engineer, Atomic Energy of Canada Limited, Canada

Laurie Swami, Director of Licensing, Plant Life Extension Project, Ontario Power Generation, Canada

"Chernobyl – Twenty Years Later"
Rosedale Room

2006 marks the twentieth anniversary of the Chernobyl nuclear accident. In this lessons learned workshop, presenters address what should be expected to happen and what has happened. Dr. Kusami, Commissioner, Nuclear Safety Commission of Japan, will outline what should be expected for Chernobyl 20 years after on the basis of experience of Hiroshima and Nagasaki. Svitlana Lynkevych of the Chornobyl Centre for Nuclear Safety, Radioactive Waste and Radioecology will provide an overview of the current situation.

Moderator:

Theresa Kirkpatrick, Senior Communications Specialist, Cameco Corporation

Presenters:

Dr. Shizuyo Kusumi, Commissioner, Nuclear Safety Commission, Japan

Svitlana Lynkevych, Chornobyl Centre for Nuclear Safety, Radioactive Waste and Radioecology, Ukraine

12:00 p.m. Lunch: "The Balanced Life", sponsored by Cameco
Regent Ballroom

Juggling the demands of a career with family and community commitments is a struggle for most people in today's workforce, especially women. Colleen Moorehead, President and CEO of Cross Off, is the former President, E*Trade Canada, and co-founder of The Judy Project, an enlightened leadership forum for executive women. She was ranked as one of the Financial Post's Power 50 in 2001 and 2002. A sought after speaker across Canada, Colleen will share her insights and experiences as a successful business executive, a mother, and a community leader and demonstrate how she is achieving her goal of living a balanced life.

Keynote Speaker:

Colleen Moorehead, President and CEO, Cross Off, Canada

1:45 p.m. "The World of WiN" - WiN Global Regional Chapter Representatives'
Presentations
Viennese Ballroom

Each WiN chapter will share its achievements since WiN members last met in the Czech Republic for WiN-Global 2005. A series of brief presentations will highlight the best of WiN in 2005/2006 providing inspiration and ideas to women in nuclear from around the world.

Afternoon presentations will be made by representatives from Korea, Lithuania, Romania, Slovakia, Spain, Sweden, Switzerland, Taiwan, USA and Canada.

3:45 pm Refreshment Break, sponsored by SNC-Lavalin Nuclear
Viennese Ballroom Foyer

4:00 p.m. Closing Plenary: "Leading the Way: A Power Executive's Perspective "
Viennese Ballroom

The energy industry is filled with opportunities and challenges as it strives to balance environmental and social responsibilities with a public demand for safe, reliable and costefficient energy. Governments are struggling to establish uniform policies dealing with emissions and global warming. Without consistent, national guidelines to follow, corporate leaders are being tested. Ruth G. Shaw will share her perspective on the role of leadership and corporate social responsibility in the 21st century. It's based on three words - Be. Know. Do.

Keynote Speaker:

Ruth G. Shaw, Duke Energy Group Executive, Public Policy and President, Duke Nuclear

4:45 p.m. Conference Closing and Invitation to WiN Global 2007 Meeting
Viennese Ballroom

5:00 pm Free Evening
