Sharing Best Practice

Trainings on radiation and energy problems A WiN – Belarus achievement

In 2005 innovative trainings on radiation and energy problems in women organizations and debates with other opponent groups on the ecological, economical and safety problems of nuclear power. We work with ordinary women as well as women opinion leaders and the journalists with the aim of increasing their knowledge about different sources of energy, especially nuclear power.

About our achievement

Social Advertising of nuclear power on TV

- Key success factors for successful advertising of nuclear power are the interesting scenario and simplicity of the subject for any person
